09:00

ITAM Foundation training - 1 day	Getting it right with Open Source Software course	ISO standards and ITAM Maturity workshop
Provided by: Piaras MacDonnell	Provided by: Paul McAdam	Provided by: Rory Canavan & Jason Keogh
<p><i>This blended learning offering is only available at the ITAM Conference 2019</i></p> <p>The Exin/ITAMOrg ITAM Foundation Certificate is the industry standard for foundation level ITAM knowledge</p> <p>The ITAM Foundation course covers all of the 4 disciplines in ITAM; Software, Hardware, People & Information (Security) and Cloud & Services Asset Management. Read more about the content of the course on the ITAMOrg website: ITAM Foundation Course and Certification</p> <p>You get access to the online training ahead of the conference and on this training you will be given a wrap up of the key elements in the course and also get the opportunity to ask questions and have areas covered further that are not clear to you.</p> <p>At the end of the day there will be a certification so you, if passed, will be able to walk away with your Exin/ITAMOrg ITAM Foundation certificate</p>	<p>Open Source Software is now broadly used in the development of software applications. The ability to reuse components of code already created allows development teams to create more code, with more functionality, faster. It also promotes the adoption of standards and makes applications more interoperable.</p> <p>With the increasing adoption of open source software in software development there is an increasing need for organisations to understand free and open source software licensing obligations and compliance issues.</p> <p>Knowledge acquired from this course: Basic legal understanding of the principles of open source software licensing</p> <p>Understand the spectrum of software licence categories e.g. reciprocal, permissive etc. Obligations in open source compliance And industry best practices</p> <p style="text-align: center;">Read more at the programme page>>></p>	<p>In this deep dive session you will get an understanding of the importance of standards within ITAM in particular and with reference to the ISO SAM/ITAM standard ISO 19770-1: 2017 but also related standards.</p> <p>What makes this updated standard so good? How does the standard refer to other Management Systems standards? And how you may approach it in taking advantage of it within your organisation.</p> <p>In the second half of the session you will be guided further into organisational maturity and an online maturity assessment will be conducted for you to bring back home.</p> <p><i>Note: To perform the online assessment please bring your own laptop to this session!</i></p>

18.00

Ice-breaker/Get together and ITAM Award Ceremony
